

The central Willamette Valley is rich in history. Its covered bridges, historic barns, and old townships are all part of a fascinating look into the life at the turn of the century. Rural roads still dominate the area and are ideal for bicycling, taking you through towns that still have that small town charm such as Scio, Independence, and Brownsville. Back roads can lead you to Buena Vista where the ferry is still the only way to cross the Willamette River. Alongside the old is the new with busier roads providing shoulders for bicyclists. Wineries have sprung up throughout the valley. With their rural locations tucked into the hills, they have become a popular destination for bicyclists. And no matter where you are, you are not far from a small town to replenish your supplies and have that ice cream you've been dreaming about.

The central Willamette Valley also has an ideal mixture of flat and hilly terrain. Riders can easily map out day routes that will match their fitness or challenge their endurance. Combine all this with easy access from outside the area with an Amtrak station centrally located in Albany or a major airport outside of Eugene and you will see that the central Willamette Valley is a bicycling paradise. Enjoy your ride, and we'll see you on the road!
